A SHIPPER'S RESOURCE

Dangerous Goods Shipping Readiness Checklist

12 things to confirm before you book your next shipment, so nothing slips at the border.

Why Misdeclared Cargo Costs You

Dangerous goods are refused, held or fined when identification, packaging and documents do not match. Mills Dangerous Goods works with Mills Packaging and Mills Permits so the cargo, the paperwork and the carrier all tell the same story.

Work through each point before you book. If you cannot tick a box, that is the item to resolve first.

The Readiness Checklist

- [ ] **1. The cargo is identified precisely**
  Have the product name, composition, form, quantity and a current safety data sheet in hand before anything is booked.

- [ ] **2. The hazard classification is confirmed**
  Confirm the classification with a qualified specialist for your transport mode, rather than assuming it from a similar product.

- [ ] **3. Restrictions for each mode are checked**
  Confirm whether the product is restricted or limited by quantity for air, sea or road, and plan the route accordingly.

- [ ] **4. Permits and clearances are mapped**
  Confirm whether any agency permit or clearance applies to the product or its end use, and that it covers this shipment.

- [ ] **5. The shipper's declaration is prepared**
  Prepare the dangerous goods declaration and supporting documents so they match the classification and the packaging used.

- [ ] **6. Packaging is approved for the goods**
  Confirm the packaging type is suitable for the hazard class and meets the requirements of the chosen transport mode.

- [ ] **7. Marking and labeling are complete**
  Check that hazard labels, markings and orientation marks are applied correctly on each package and on the outer unit.

- [ ] **8. Carrier acceptance is confirmed in advance**
  Get written acceptance from the airline or shipping line before the cargo moves, since many carriers restrict certain classes.

- [ ] **9. Customs entry details match the declaration**
  Make sure the description and classification on the customs entry agree with the dangerous goods documents.

The Readiness Checklist (continued)

- [ ] **10. Storage and handling at destination are planned**
  Confirm where the cargo will be stored and handled on arrival, and that the facility is suitable for its hazard class.

- [ ] **11. Delivery arrangements fit the cargo**
  Use trucking operators and drivers able to carry the cargo, and confirm the route and receiving contact before dispatch.

- [ ] **12. Incident documentation is ready**
  Keep emergency contacts, handling instructions and shipment records available, so any incident can be reported and managed quickly.

Not sure every box is ticked? Let Mills Dangerous Goods review it with you.

Book a short call and we will walk through your next shipment and flag anything to resolve before it moves.
