A SHIPPER'S RESOURCE

Agriculture, Plants, Animals and Fisheries Import Readiness Checklist

12 things to confirm before you book your next shipment, so the permits, customs treatment and delivery plan are settled early.

Why Late Compliance Costs You in Agriculture

For agriculture, plants, animals and fisheries cargo, the cost is rarely the freight. It is a permit, classification or handling requirement discovered after the goods have already shipped. Typical cargo includes seeds, plants, produce, grains, feeds, live animals, animal products, fish, seafood and agricultural inputs. Mills Permits, Mills Customs and Mills Logistics work together to settle these points before you book.

Use this list before you book. Any box you cannot tick is the item to resolve first.

The Readiness Checklist

- ☐ **1. The cargo category is identified**
  Decide whether the cargo is a plant, animal, fishery, meat, feed or agricultural input, since this decides which agency regulates it.

- ☐ **2. Importer registration with the right agency is in place**
  Confirm whether the agency for your product requires its own registration or accreditation, and that it is current.

- ☐ **3. Permits are mapped by agency**
  Confirm which of BPI, BAI, BFAR or NMIS applies to your cargo, and what permit or clearance each one requires.

- ☐ **4. Sanitary and phytosanitary requirements are known**
  Confirm the health and inspection certificates needed from the origin country, and who must issue them.

- ☐ **5. Fertilizer and pesticide rules are checked**
  For agricultural inputs, confirm whether FPA registration or clearance applies to the product.

- ☐ **6. Commodity bodies are checked where they apply**
  For crops and commodities such as coconut, sugar, tobacco or grain, confirm whether PCA, SRA, NTA or NFA requirements currently apply.

- ☐ **7. FDA coverage is checked for processed products**
  If the goods are processed food or supplements, confirm whether FDA licensing or registration also applies.

- ☐ **8. Classification and valuation are settled**
  Agree on the tariff classification and the supporting value documents, and keep them consistent across all papers.

- ☐ **9. Packaging and labeling meet the rules**
  Check labels, packaging and any treated wood used, since failures here can lead to rejection.

The Readiness Checklist (continued)

- ☐ **10. Transport and storage suit the cargo**
  For perishable or live cargo, confirm the temperature, space and holding facilities needed from arrival to delivery.

- ☐ **11. Arrival inspection is coordinated**
  Plan for agency inspection or quarantine on arrival, and name a contact who can respond quickly.

- ☐ **12. Permit validity and records are confirmed**
  Check that each permit covers the quantity and dates of the shipment, and keep the records together.

Moving agriculture cargo? Let us check it before it ships.

Book a short call and we will review your product, permits and delivery plan before it moves.
