A SHIPPER'S RESOURCE

Chemicals and Controlled Materials Import Readiness Checklist

12 things to confirm before you book your next shipment, so the permits, customs treatment and delivery plan are settled early.

Why Late Compliance Costs You in Chemicals

For chemicals and controlled materials cargo, the cost is rarely the freight. It is a permit, classification or handling requirement discovered after the goods have already shipped. Typical cargo includes industrial chemicals, laboratory reagents, solvents, coatings, gases, acids, fuels, precursors and controlled materials. Mills Permits, Mills Customs and Mills Logistics work together to settle these points before you book.

Use this list before you book. Any box you cannot tick is the item to resolve first.

The Readiness Checklist

- ☐ **1. Each chemical is identified precisely**
  Record the product name, CAS number, concentration and quantity, and have a current safety data sheet.

- ☐ **2. PICCS listing is checked**
  Confirm whether the substance is listed on the DENR-EMB inventory, and what is needed if it is not.

- ☐ **3. Chemical control rules are checked**
  Confirm whether a chemical control order, PMPIN or CCO requirement applies to the substance.

- ☐ **4. Precursor and controlled-drug rules are checked**
  Confirm whether PDEA or DDB requirements apply to any precursor chemical in the shipment.

- ☐ **5. Radioactive material rules are checked**
  If any item may contain radioactive material, confirm whether PNRI clearance applies.

- ☐ **6. FPA and FDA coverage is checked**
  For pesticides, fertilizers or products used in health and food, confirm whether FPA or FDA rules also apply.

- ☐ **7. Permit validity is confirmed**
  Check that each permit covers the quantity, product and shipment dates, and will be valid on arrival.

- ☐ **8. Dangerous goods classification is confirmed**
  Confirm the hazard class and transport restrictions with a qualified specialist before booking.

- ☐ **9. Packaging and labeling are compliant**
  Check that packaging, markings and labels meet the rules for the hazard class and transport mode.

The Readiness Checklist (continued)

- [ ] **10. Customs classification and valuation are settled**
  Agree on the tariff classification and value, and make sure they match all permits.

- [ ] **11. Storage and handling at destination are planned**
  Confirm that the receiving site is suitable and authorized for the chemical, with trained handling staff.

- [ ] **12. Transport and records are arranged**
  Use carriers able to move the cargo, and keep permits, declarations and delivery records on file.

Moving chemicals cargo? Let us check it before it ships.

Book a short call and we will review your product, permits and delivery plan before it moves.
