A SHIPPER'S RESOURCE

Construction and Infrastructure Import Readiness Checklist

12 things to confirm before you book your next shipment, so the permits, customs treatment and delivery plan are settled early.

Why Late Compliance Costs You in Construction

For construction and infrastructure cargo, the cost is rarely the freight. It is a permit, classification or handling requirement discovered after the goods have already shipped. Typical cargo includes cranes, excavators, batching plants, structural materials, steel, cement products, generators, elevators and project equipment. Mills Permits, Mills Customs and Mills Logistics work together to settle these points before you book.

Use this list before you book. Any box you cannot tick is the item to resolve first.

The Readiness Checklist

- ☐ **1. The equipment and materials list is complete**
  List each item with its specifications, quantity, condition and where it will be used on the project.

- ☐ **2. Used-equipment eligibility is checked**
  If any item is used, confirm whether it is allowed to be imported and what evidence of condition is required.

- ☐ **3. Product standards are checked**
  For steel, cement products and similar materials, confirm whether DTI-BPS certification applies.

- ☐ **4. Vehicle and mobile equipment rules are checked**
  For mobile equipment, confirm whether FTEB or LTO steps apply before it can be used.

- ☐ **5. Environmental requirements are reviewed**
  Confirm whether DENR requirements apply to equipment that affects emissions, waste or noise.

- ☐ **6. Tariff classification is agreed**
  Agree on classification for each item, including parts supplied with it, and keep it consistent.

- ☐ **7. BIR and tax treatment is checked**
  Confirm whether an ATRIG applies and what duties and taxes should be expected.

- ☐ **8. Valuation documents are gathered**
  Collect contracts, invoices and payment terms that support the declared value.

- ☐ **9. The shipping method for large items is chosen**
  Decide between container, breakbulk or out-of-gauge handling based on dimensions and weight.

The Readiness Checklist (continued)

- [ ] **10. Local transport permits and route are confirmed**
  Check road limits and permits for oversized loads, and review the route to the site.

- [ ] **11. Site readiness is confirmed**
  Confirm access, unloading space and lifting equipment at the site before cargo is dispatched.

- [ ] **12. Delivery is sequenced with the schedule**
  Match arrival dates with the construction schedule, so cargo does not wait on site or in storage.

Moving construction cargo? Let us check it before it ships.

Book a short call and we will review your product, permits and delivery plan before it moves.
