A SHIPPER'S RESOURCE

Telecommunications, Electronics and IT Hardware Import Readiness Checklist

12 things to confirm before you book your next shipment, so the permits, customs treatment and delivery plan are settled early.

Why Late Compliance Costs You in Telecommunications

For telecommunications, electronics and IT hardware cargo, the cost is rarely the freight. It is a permit, classification or handling requirement discovered after the goods have already shipped. Typical cargo includes telecom equipment, radios, routers, phones, IoT devices, computers, peripherals, storage devices and consumer electronics. Mills Permits, Mills Customs and Mills Logistics work together to settle these points before you book.

Use this list before you book. Any box you cannot tick is the item to resolve first.

The Readiness Checklist

- ☐ **1. The product types are listed**
  List each product with its model and features, such as wireless, battery or storage, since these drive the rules.
- ☐ **2. NTC approval is checked**
  For radio and wireless devices, confirm whether an NTC permit or type approval applies.
- ☐ **3. Product standards are checked**
  Confirm whether DTI-BPS certification applies to the product before it is imported.
- ☐ **4. Optical media and storage rules are checked**
  Confirm whether OMB requirements apply to optical media or similar storage devices.
- ☐ **5. Health and radiation rules are checked**
  For items that emit radiation or relate to health, confirm whether FDA rules apply.
- ☐ **6. Batteries are identified for transport**
  Flag lithium and other batteries, and confirm how they will be packed and declared.
- ☐ **7. Importer and tax status are confirmed**
  Confirm the importer's status with BIR and customs, and the tax treatment expected.
- ☐ **8. Classification is settled**
  Agree on the tariff classification for each product, including accessories, and keep it consistent.
- ☐ **9. Valuation and brand rights are checked**
  Check the declared value, and confirm there is no conflict with brand or intellectual property rights.

The Readiness Checklist (continued)

- ☐ **10. Labeling is compliant**
  Confirm that product labels and markings meet the requirements for sale in the Philippines.

- ☐ **11. Packaging protects the goods**
  Check packing for shock, static and moisture, especially for high-value consumer electronics.

- ☐ **12. Delivery and returns are planned**
  Plan delivery to warehouses or stores and how returned or defective goods will be handled.

Importing telecom and electronics? Let us check it before it ships.

Book a short call and we will review your product, permits and delivery plan before it moves.
