A SHIPPER'S RESOURCE

Pharmaceuticals, Medical Devices and Healthcare Import Readiness Checklist

12 things to confirm before you book your next shipment, so the permits, customs treatment and delivery plan are settled early.

Why Late Compliance Costs You in Healthcare

For pharmaceuticals, medical devices and healthcare cargo, the cost is rarely the freight. It is a permit, classification or handling requirement discovered after the goods have already shipped. Typical cargo includes medicines, vaccines, medical devices, diagnostic machines, laboratory equipment, hospital systems and healthcare supplies. Mills Permits, Mills Customs and Mills Logistics work together to settle these points before you book.

Use this list before you book. Any box you cannot tick is the item to resolve first.

The Readiness Checklist

- ☐ **1. The product class is identified**
  Say whether each item is a medicine, device, equipment or supply, since the class decides the rules.
- ☐ **2. FDA licenses and registrations are confirmed**
  Confirm the FDA license to operate and product registration or notification needed for each item.
- ☐ **3. Controlled medicines are checked**
  For controlled substances, confirm whether PDEA or DDB permits are required and when they must be in place.
- ☐ **4. Radiation-related rules are checked**
  For equipment using radiation or radioactive material, confirm whether PNRI requirements apply.
- ☐ **5. Tax treatment is confirmed**
  For donations or items that may qualify for special tax treatment, confirm whether BIR steps such as an ATRIG apply.
- ☐ **6. Cold chain and temperature needs are covered**
  For vaccines and temperature-sensitive products, confirm the range, equipment and monitoring.
- ☐ **7. Dangerous goods are identified**
  Flag gases, reagents and other regulated items, and prepare the declarations they need.
- ☐ **8. Classification and valuation are settled**
  Agree on the tariff classification and value for each item, with documents that support both.
- ☐ **9. Labeling and expiry dates are checked**
  Check that labels, expiry dates and product information meet requirements and leave time for use.

The Readiness Checklist (continued)

- ☐ **10. Equipment site readiness is confirmed**
  For large equipment, confirm space, power, access and installation support are ready before arrival.

- ☐ **11. Delivery to facilities is arranged**
  Plan delivery to hospitals and clinics with receiving hours, access and a contact who can sign.

- ☐ **12. Traceability and service records are kept**
  Keep lot numbers, permits and service records together so products can be traced and supported.

Importing healthcare products? Let us check it before it ships.

Book a short call and we will review your product, permits and delivery plan before it moves.
