A SHIPPER'S RESOURCE

Manufacturing and Industrial Machinery Import Readiness Checklist

12 things to confirm before you book your next shipment, so the permits, customs treatment and delivery plan are settled early.

Why Late Compliance Costs You in Manufacturing

For manufacturing and industrial machinery cargo, the cost is rarely the freight. It is a permit, classification or handling requirement discovered after the goods have already shipped. Typical cargo includes production lines, CNC machines, presses, boilers, pumps, compressors, conveyors, robotics, tooling and spare parts. Mills Permits, Mills Customs and Mills Logistics work together to settle these points before you book.

Use this list before you book. Any box you cannot tick is the item to resolve first.

The Readiness Checklist

- [ ] **1. The equipment list is complete**
  List each machine, its parts and its spares, with specifications, condition and the line it will serve.
- [ ] **2. Incentive status is confirmed**
  If you expect PEZA or BOI incentives, confirm the status and what must be in place before arrival.
- [ ] **3. Used-machinery eligibility is checked**
  If any machine is used, confirm whether it can be imported and what proof of condition is needed.
- [ ] **4. Product standards are checked**
  Confirm whether BPS certification applies to any item in the shipment.
- [ ] **5. Environmental rules are reviewed**
  Confirm whether DENR requirements apply to equipment such as boilers or items affecting emissions.
- [ ] **6. Safety and technical approvals are mapped**
  Identify any safety or technical approval tied to the machine, and who issues it.
- [ ] **7. Tariff classification is agreed**
  Agree on classification for each machine and its parts, and keep descriptions consistent.
- [ ] **8. Valuation is reviewed**
  Check how tooling, software, installation and spares are valued, and keep documents that support the figures.
- [ ] **9. Packaging and crating are planned**
  Plan crating that protects machinery on the voyage and meets wood treatment rules.

The Readiness Checklist (continued)

- [ ] **10. Heavy transport and rigging are arranged**
  Arrange trucks, lifting and rigging for heavy units from the port to the plant.

- [ ] **11. Installation site readiness is confirmed**
  Confirm foundations, power, access and space are ready at the plant before cargo arrives.

- [ ] **12. Spares and records are organized**
  Keep permits, customs papers and a spares list together for future maintenance and audits.

Moving manufacturing cargo? Let us check it before it ships.

Book a short call and we will review your product, permits and delivery plan before it moves.
