A SHIPPER'S RESOURCE

Mining, Minerals and Industrial Materials Import Readiness Checklist

12 things to confirm before you book your next shipment, so the permits, customs treatment and delivery plan are settled early.

Why Late Compliance Costs You in Mining

For mining, minerals and industrial materials cargo, the cost is rarely the freight. It is a permit, classification or handling requirement discovered after the goods have already shipped. Typical cargo includes mining machinery, drilling equipment, processing systems, reagents, explosives, mineral samples and plant components. Mills Permits, Mills Customs and Mills Logistics work together to settle these points before you book.

Use this list before you book. Any box you cannot tick is the item to resolve first.

The Readiness Checklist

- ☐ **1. The cargo is categorized**
  Group the cargo into machinery, reagents, explosives, samples and plant components, since each faces different rules.

- ☐ **2. DENR and MGB requirements are checked**
  Confirm whether DENR or MGB permits or notifications apply to your equipment, samples or operations.

- ☐ **3. Explosives rules are checked**
  For explosives and related items, confirm whether PNP-FEO permits are required and when.

- ☐ **4. Precursor chemicals are identified**
  Confirm whether PDEA requirements apply to any chemical in the shipment.

- ☐ **5. Dangerous goods are classified**
  Confirm hazard classes for reagents and other regulated items with a qualified specialist.

- ☐ **6. Chemical permits are mapped**
  Confirm which chemical registrations or clearances apply to reagents, and who issues them.

- ☐ **7. BIR and tax treatment is checked**
  Confirm whether an ATRIG applies and what duties and taxes should be expected.

- ☐ **8. Classification and valuation are settled**
  Agree on classification and supporting value documents for each machine and component.

- ☐ **9. Packaging suits the route**
  Plan packaging that protects heavy parts and meets wood treatment rules for the voyage.

The Readiness Checklist (continued)

- [ ] **10. Project transport is planned**
  Plan heavy-haul trucking, escorts and route checks from the port to the mine or plant.

- [ ] **11. Delivery to a remote site is arranged**
  Confirm road access, security and receiving staff at the site, and allow for weather and distance.

- [ ] **12. Records are kept for audits**
  Keep permits, customs papers and handling records together for future inspections.

Moving mining cargo?
Let us check it before it ships.

Book a short call and we will review your product, permits and delivery plan before it moves.
