A SHIPPER'S RESOURCE

Project Cargo Readiness Checklist

12 things to confirm before you book your next shipment, so nothing slips at the border.

Why Unplanned Project Cargo Costs You

Oversized or heavy cargo fails on route constraints, lifting plans and permits that were not checked before the purchase order. Mills Projects plans the move with Mills Logistics, Mills Packaging and Mills Customs so the cargo can actually reach its site.

Work through each point before you book. If you cannot tick a box, that is the item to resolve first.

The Readiness Checklist

- ☐ **1. Cargo dimensions and weights are confirmed**
  Get final dimensions, weights and lifting points from the manufacturer, not estimates, before planning the move.

- ☐ **2. The cargo category is decided**
  Decide whether the cargo is containerized, breakbulk, oversized or out of gauge, since this shapes vessel, port and cost.

- ☐ **3. The origin and loading plan is set**
  Confirm where and how the cargo will be loaded at origin, and who is responsible for lifting and securing it.

- ☐ **4. Route and site are reviewed**
  Check the full route and the destination site for height, width, weight and turning limits before committing.

- ☐ **5. Port and terminal acceptance is confirmed**
  Confirm that the discharge port and terminal can handle the cargo's weight and size, and the equipment it needs.

- ☐ **6. Lifting and securing plans are prepared**
  Prepare lifting plans and lashing arrangements for the cargo, reviewed by someone qualified to approve them.

- ☐ **7. Heavy-haul transport is arranged**
  Line up specialized trucks, escorts and any road permits needed to move the cargo from the port to the site.

- ☐ **8. Customs and permits are mapped**
  Identify the customs treatment and any permit that applies to the cargo, and who will secure each one.

- ☐ **9. Packaging and protection are planned**
  Agree how the cargo will be protected during the voyage and storage, including coverings and supports.

The Readiness Checklist (continued)

- [ ] **10. The schedule is tied to project milestones**
  Match the shipping schedule to your site readiness and project dates, and leave buffer for port and weather delays.

- [ ] **11. Insurance is coordinated**
  Confirm cover suitable for project cargo through licensed insurance partners, and the terms that apply.

- [ ] **12. Reporting and site handover are agreed**
  Agree how progress will be reported, and how the cargo is positioned and handed over at the site.

Not sure every box is ticked? Let Mills Projects review it with you.

Book a short call and we will walk through your next shipment and flag anything to resolve before it moves.
